### ⚡ STEERING BOARD :

The **Steering board** used in the company's elevators are **microprocessor-based** and have the best standard boards.

They are according to the technology of the they with **super-high capabilities**.

The **blackout** system is capable to direct the elevator to the nearest floor in case of sudden power failure , so that passengers can leave it.

The variable speed drive system (**VVVF**) , in addition to its remarkable softness in precise cabin movement and leveling , **saves up to 50%** of the power consumption.

SEPEHR LIFT Co.

⚙️ STEERING KNOBS:

The **steering knobs** used in the company's elevator are designed in a variety of stylish steels with the finest materials and excellent beauty and charm.

## ⚡ HYDRAULIC ELEVATOR :

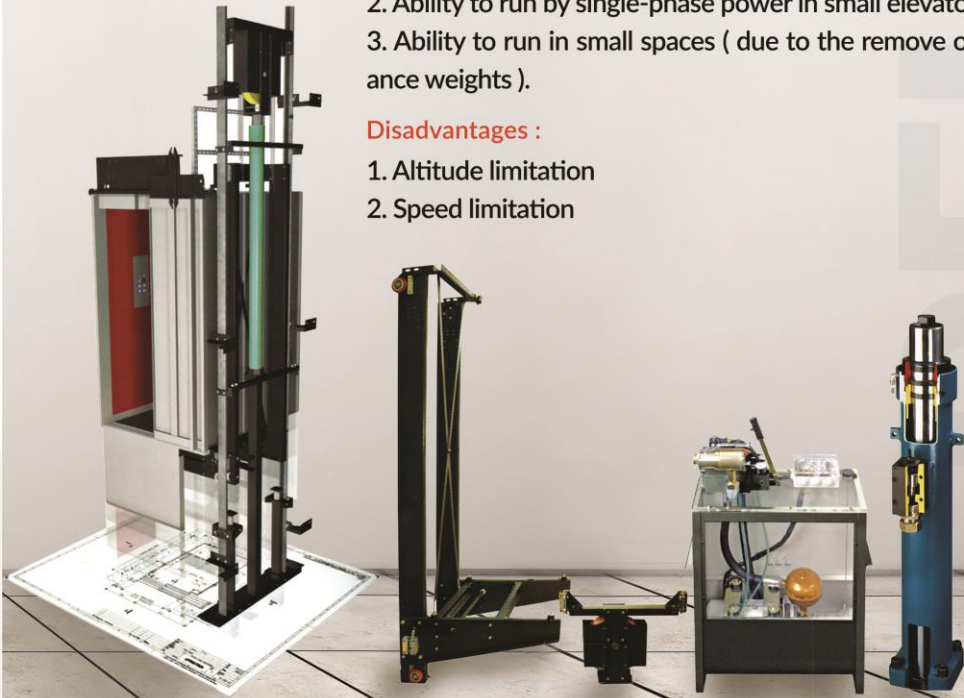

Hydraulic elevators are in power house less group.

### Advantages :

1. No need to power house on the top of the building .
2. Ability to run by single-phase power in small elevators.
3. Ability to run in small spaces ( due to the remove of balance weights ).

### Disadvantages :

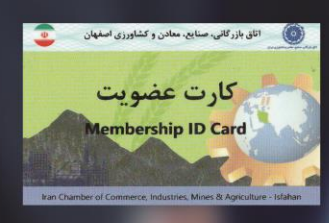

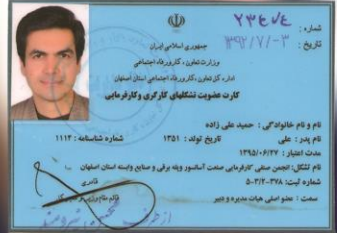

1. Altitude limitation
2. Speed limitation
